The company

Nautisat is a leading designer and manufacturer of marine stabilized antenna systems for satellite communications.

Since 20 years his expert designers and workers team up to offer high-grade products ranging from large 300cm dish antennas to smaller 60cm ones.

Every Nautisat antenna system, both in its mechanical and electrical part, is entirely designed in our laboratories to always develop into a well-engineered and cost balanced product.

Nautisat is iso 9001 compliant and his products achieve the following military standards:

- MIL-STD-461 RFI/EMI
- MIL-STD-167-1 Mechanical vibration of shipboard equipment
- MIL-STD-901D Shock testing for shipboard equipment
